SAFETY MEETING - ENGLISH FACE SHIELD

FACE SHIELD

1. Inspect before each use
2. Follow manufacturer's recommendation
3. Identify jobs and tasks that present potential hazards to your face,
4. Wear face shield when potential hazards to your face is present, for example:
 - A- Abrasive wheels such as those used on grinding and cutting equipment can shatter and strike you in the face.
 - B- Sparks and molten metals produced when working with or around certain pieces of equipment or processes can burn your face.
 - C- Corrosive or caustic chemicals in liquid or powder form can cause a chemical burn on your face.
 - D- Toxic chemicals that can be absorbed through your skin could splash onto your face.
 - E- The arc-flash created when welding or working around high-voltage electrical equipment can burn your face.
 - F- Blood or other potentially infectious materials may splatter or spray onto your face and possibly enter your eyes, nose, or mouth.
